

Employee Voluntary Products

Let employees build their own comprehensive benefits package to suit their lifestyle and needs

myHSA's partnerships allow a range of add-ons for employees to choose from through the Marketplace – an interactive shopping experience for employees

How does it work?

myMarketplace allows employees to use their funds provided by their employer in selecting add-ons to meet their needs. Employees are given 15 days to purchase products and/or allocate their funds at the start of the benefits year – choosing between the myHSA (non-taxable), myWSA (taxable) if they're given the option, along with a suite of products. Once a selection is made, employees are locked in for 12 months.

myHSA provides myMarketplace partners with employee enrollment data every month and handles the remittance of funds to the partner and commissions to the advisors.
